**“§2446a. Requirement for modular open system approach in major defense acquisition programs; definitions**

“(a) MODULAR OPEN SYSTEM APPROACH REQUIREMENT.—A major defense acquisition program that receives Milestone A or Milestone B approval after January 1, 2019, shall be designed and developed, to the maximum extent practicable, with a modular open system approach to enable incremental development and enhance competition, innovation, and interoperability.

“(b) DEFINITIONS.—In this chapter:

“(1) The term ‘modular open system approach’ means, with respect to a major defense acquisition program, an integrated business and technical strategy that—

“(A) employs a modular design that uses major system interfaces between a major system platform and a major system component, between major system components, or between major system platforms;

“(B) is subjected to verification to ensure major system interfaces comply with, if available and suitable, widely supported and consensus-based standards;

“(C) uses a system architecture that allows severable major system components at the appropriate level to be incrementally added, removed, or replaced throughout the life cycle of a major system platform to afford opportunities for enhanced competition and innovation while yielding—

“(i) significant cost savings or avoidance;

“(ii) schedule reduction;

“(iii) opportunities for technical upgrades;

“(iv) increased interoperability, including system of systems interoperability and mission integration; or

“(v) other benefits during the sustainment phase of a major weapon system; and

“(D) complies with the technical data rights set forth in section 2320 of this title.

“(2) The term ‘major system platform’ means the highest level structure of a major weapon system that is not physically mounted or installed onto a higher level structure and on which a major system component can be physically mounted or installed.

“(3) The term ‘major system component’—

“(A) means a high level subsystem or assembly, including hardware, software, or an integrated assembly of both, that can be mounted or installed on a major system platform through well-defined major system interfaces; and

“(B) includes a subsystem or assembly that is likely to have additional capability requirements, is likely to change because of evolving technology or threat, is needed for interoperability, facilitates incremental deployment of capabilities, or is expected to be replaced by another major system component.

“(4) The term ‘major system interface’—

“(A) means a shared boundary between a major system platform and a major system component, between major system components, or between major system platforms, defined by various physical, logical, and functional characteristics, such as electrical, mechanical, fluidic, optical, radio frequency, data, networking, or software elements; and

“(B) is characterized clearly in terms of form, function, and the content that flows across the interface in order to enable technological innovation, incremental improvements, integration, and interoperability.

“(5) The term ‘program capability document’ means, with respect to a major defense acquisition program, a document that specifies capability requirements for the program, such as a capability development document or a capability production document.

“(6) The terms ‘program cost targets’ and ‘fielding target’ have the meanings provided in section 2448a(a) of this title.

“(1) clearly describe the modular open system approach to be used for the program;

“(2) differentiate between the major system platform and major system components being de-

veloped under the program, as well as major system components developed outside the program that will be integrated into the major defense acquisition program;

“(3) clearly describe the evolution of major system components that are anticipated to be added, removed, or replaced in subsequent increments;

“(4) identify additional major system components that may be added later in the life cycle of the major system platform;

“(5) clearly describe how intellectual property and related issues, such as technical data deliverables, that are necessary to support a modular open system approach, will be addressed; and

“(6) clearly describe the approach to systems integration and systems-level configuration management to ensure mission and information assurance.

“(d) REQUEST FOR PROPOSALS.—The milestone decision authority for a major defense acquisition program that uses a modular open system approach shall ensure that a request for proposals for the development or production phases of the program shall describe the modular open system approach and the minimum set of major system components that must be included in the design of the major defense acquisition program.

“(1) in the case of a program that uses a modular open system approach—

“(A) the program incorporates clearly defined major system interfaces between the major system platform and major system components, between major system components, and between major system platforms;

“(B) such major system interfaces are consistent with the widely supported and consensus-based standards that exist at the time of the milestone decision, unless such standards are unavailable or unsuitable for particular major system interfaces; and

“(C) the Government has arranged to obtain appropriate and necessary intellectual property rights with respect to such major system interfaces upon completion of the development of the major system platform; or

“(2) in the case of a program that does not use a modular open system approach, that the use of a modular open system approach is not practicable.

**“§2446c. Requirements relating to availability of major system interfaces and support for modular open system approach**

“The Secretary of each military department shall—

“(1) coordinate with the other military departments, the defense agencies, defense and other private sector entities, national standards-setting organizations, and, when appropriate, with elements of the intelligence community with respect to the specification, identification, development, and maintenance of major system interfaces and standards for use in major system platforms, where practicable;

“(2) ensure that major system interfaces incorporate commercial standards and other widely supported consensus-based standards that are validated, published, and maintained by recognized standards organizations to the maximum extent practicable;

“(3) ensure that sufficient systems engineering and development expertise and resources are available to support the use of a modular open system approach in requirements development and acquisition program planning;

**SEC. 1088. SENSE OF CONGRESS REGARDING CONNECTICUT'S SUBMARINE CENTURY.**

(a) **FINDINGS.**—Congress makes the following findings:

(1) On March 2, 1867, Congress enacted a naval appropriations Act that authorized the Secretary of the Navy to “receive and accept a deed of gift, when offered by the State of Connecticut, of a tract of land with not less than one mile of shore front on the Thames River near New London, Connecticut, to be held by the United States for naval purposes”.

(2) The people of Connecticut and the towns and cities in the southeastern region of Connecticut subsequently gifted land to establish a military installation to fulfil the Nation's need for a naval facility on the Atlantic coast.

(3) On April 11, 1868, the Navy accepted the deed of gift of land from Connecticut to establish a naval yard and storage depot along the eastern shore of the Thames River in Groton, Connecticut.

(4) Between 1868 and 1912, the New London Navy Yard supported a diverse range of missions, including berthing inactive Civil War era ironclad warships and serving as a coaling station for refueling naval ships traveling in New England waters.

(5) Congress rejected the Navy's proposal to close New London Navy Yard in 1912, following an impassioned effort by Congressman Edwin W. Higgins, who stated that “this action proposed is not only unjust but unreasonable and unsound as a military proposition”.

(6) The outbreak of World War I and the enemy use of submarines to sink allied military and civilian ships in the Atlantic sparked a new focus on developing submarine capabilities in the United States.

(7) October 18, 1915, marked the arrival at the New London Navy Yard of the submarines G-1, G-2, and G-4 under the care of the tender USS Ozark and the arrival of submarines E-1, D-1, and D-3 under the care of the tender USS Tonopah. November 1, 1915, marked the arrival of the first ship built as a submarine tender, the USS Fulton (AS-1).

(8) On June 21, 1916, Commander Yeates Stirling assumed the command of the newly designated Naval Submarine Base New London, the New London Submarine Flotilla, and the Submarine School.

(9) In the 100 years since the arrival of the first submarines to the base, Naval Submarine Base New London has grown to occupy more than 680 acres along the east side of the Thames River, with more than 160 major facilities, 15 nuclear submarines, and more than 70 tenant commands and activities, including the Submarine Learning Center, Naval Submarine School, the Naval Submarine Medical Research Laboratory, the Naval Undersea Medical Institute, and the newly established Undersea Warfighting Development Center.

(10) In addition to being the site of the first submarine base in the United States, Connecticut was home to the foremost submarine manufacturers of the time, the Lake Torpedo Boat Company in Bridgeport and the Electric Boat Company in Groton, which later became General Dynamics Electric Boat.

(11) General Dynamics Electric Boat, its talented workforce, and its Connecticut-based and nationwide network of suppliers have delivered more than 200 submarines from its current location in Groton, Connecticut, including the first nuclear-powered submarine, the USS Nautilus (SSN 571), and nearly half of the nuclear submarines ever built by the United States.

(12) The Submarine Force Museum, located adjacent to Naval Submarine Base New London in Groton, Connecticut, is the only submarine museum operated by the United States Navy and today serves as the primary repository for

artifacts, documents, and photographs relating to the bold and courageous history of the Submarine Force and highlights as its core exhibit the Historic Ship Nautilus (SSN 571) following her retirement from service.

(13) Reflecting the close ties between Connecticut and the Navy that began with the gift of land that established the base, the State of Connecticut has set aside \$40,000,000 in funding for critical infrastructure investments to support the mission of the base, including construction of a new dive locker building, expansion of the Submarine Learning Center, and modernization of energy infrastructure.

(14) On September 29, 2015, Connecticut Governor Dannel Malloy designated October 2015 through October 2016 as Connecticut's Submarine Century, a year-long observance that celebrates 100 years of submarine activity in Connecticut, including the Town of Groton's distinction as the Submarine Capital of the World, to coincide with the centennial anniversary of the establishment of Naval Submarine Base New London and the Naval Submarine School.

(15) Whereas Naval Submarine Base New London still proudly proclaims its motto of “The First and Finest”.

(16) Congressman Higgins' statement before Congress in 1912 that “Connecticut stands ready, as she always has, to bear her part of the burdens of the national defense” remains true today.

(b) **SENSE OF CONGRESS.**—Congress—

(1) commends the longstanding dedication and contribution to the Navy and submarine force by the people of Connecticut, both through the initial deed of gift that established what would become Naval Submarine Base New London and through their ongoing commitment to support the mission of the base and the Navy personnel assigned to it;

(2) honors the submariners who have trained and served at Naval Submarine Base New London throughout its history in support of the Nation's security and undersea superiority;

(3) recognizes the contribution of the industry and workforce of Connecticut in designing, building, and sustaining the Navy's submarine fleet; and

(4) encourages the recognition of Connecticut's Submarine Century by Congress, the Navy, and the American people by honoring the contribution of the people of Connecticut to the defense of the United States and the important role of the submarine force in safeguarding the security of the United States for more than a century.

**SEC. 1089. SENSE OF CONGRESS REGARDING THE REPORTING OF THE MV-22 MISHAP IN MARANA, ARIZONA, ON APRIL 8, 2000.**

It is the sense of Congress that—

(1) in the report accompanying H.R. 1735 of the 114th Congress (House Report 114-102), the Committee on Armed Services of the House of Representatives encouraged the Secretary of Defense to “publicly clarify the causes of the MV-22 mishap at Marana Northwest Regional Airport, Arizona, in a way consistent with the results of all investigations as soon as possible”;

(2) the Deputy Secretary of Defense Robert O. Work did an excellent job reviewing the investigations of such mishap and concluded that there was a misrepresentation of facts by the media which incorrectly identified pilot error as the cause of the mishap which the Deputy Secretary publicly made known in March 2016; and

(3) Congress is grateful for the successful conclusion to this tragic situation.

**SEC. 1090. COST OF WARS.**

The Secretary of Defense, in consultation with the Commissioner of the Internal Revenue Service and the Director of the Bureau of Economic Analysis, shall post on the public Internet

website of the Department of Defense the costs to each United States taxpayer of each of the wars in Afghanistan, Iraq, and Syria.

(2) **ASSESSMENT OF ANALYSES.**—The Chairman of the Joint Chiefs of Staff and Chief of Staff of the Army shall then each separately assess the operational merits, feasible force mix under programmed end-strength, estimated costs for assessed potential force structure changes, and strategic force sufficiency and risk of each analysis conducted under paragraph (1).

(b) **REPORTS REQUIRED.**—Not later than one year after the date of the enactment of this Act, the Chairman of the Joint Chiefs of Staff and the Chief of Staff of the Army shall each submit to the Committees on Armed Services of the Senate and House of Representatives a separate report on the alternative designs and operational concepts analyzed under subsection (a)(1). Each such report shall include an assessment of the merits and sufficiency of such designs and concepts, the potential for future experimentation (such as a follow-on pilot program), and the recommendation of the Chairman and Chief of Staff, as the case may be, regarding the Reconnaissance Strike Group.

(c) **INDEPENDENT ASSESSMENTS REQUIRED.**—Before submittal of the reports required under subsection (b), the Chairman of the Joint Chiefs of Staff and the Chief of Staff of the Army shall each select a Federally Funded Research and Development Center to review and evaluate each report. The review and evaluation of each report shall be submitted to the Committees on Armed Services of the Senate and House of Representatives together with the reports under subsection (b).

(1) The processes of the Department of Defense for addressing the recommendations of the Department of Defense Internal Nuclear Enterprise Review, the Independent Review of the Department of Defense Nuclear Enterprise, and other recommendations affecting the health of the nuclear enterprise of the Department of Defense identified or tracked by the Nuclear Deterrence Enterprise Review Group, including the process used by the Director of Cost Assessment and Program Evaluation to evaluate the implementation of such recommendations.

**SEC. 1671. SENSE OF CONGRESS ON NUCLEAR DETERRENCE.**

It is the sense of Congress that—

(1) the nuclear forces of the United States continue to play a fundamental role in deterring aggression against the interests of the United States and the allies of the United States in an increasingly dangerous world in which foreign adversaries, including the Russian Federation, are making explicit nuclear threats against the United States and such allies;

(2) strong United States nuclear forces assure the allies of the United States that the extended deterrence guarantees of the United States are credible and that the resolve of the United States remains strong even in the face of nuclear provocations, including nuclear coercion and blackmail;

(3) the prevention of war through effective deterrence requires survivable and flexible nuclear forces that are well exercised and ready to respond to nuclear escalation if necessary;

(4) possessing a range of capabilities and options to counter nuclear threats assures the allies of the United States and enhances the credibility of United States nuclear deterrence by reinforcing the resolve of the United States in the minds of such allies and potential adversaries;

(5) the declared policy of the United States with respect to the use of nuclear weapons must be coordinated and communicate clearly that the use of nuclear weapons against the United States or its vital interests would ultimately fail and subject the aggressor to incalculable consequences;

(6) in support of a strong and credible nuclear deterrent, the United States must—

(A) maintain a nuclear force with a diverse, flexible range of nuclear yield and delivery modes that are ready, capable, and credible;

(B) afford the highest priority to the modernization of the nuclear triad, dual-capable aircraft, and related command and control elements; and

(C) ensure the broadest participation of allies of the United States in nuclear defense plan-

ning, training, and exercises to demonstrate the commitment of the United States and such allies and their solidarity against nuclear threats and coercion; and

(7) with respect to the North Atlantic Treaty Organization (NATO)—

(A) NATO has made it clear at the NATO summit in Warsaw, Poland, in July 2018, that—

(i) “the fundamental purpose of NATO’s nuclear capability is to preserve peace, prevent coercion, and deter aggression”; and

(ii) “Nuclear weapons are unique. Any employment of nuclear weapons against NATO would fundamentally alter the nature of a conflict. The circumstances in which NATO might have to use nuclear weapons are extremely remote. If the fundamental security of any of its members were to be threatened however, NATO has the capabilities and resolve to impose costs on an adversary that would be unacceptable and far outweigh the benefits that an adversary could hope to achieve.”; and

(B) accordingly, effective deterrence requires that NATO conduct realistic nuclear planning and exercises, and modernize the full suite of dual-capable aircraft and associated command and control networks and facilities.

**SEC. 1672. SENSE OF CONGRESS ON IMPORTANCE OF INDEPENDENT NUCLEAR DETERRENT OF UNITED KINGDOM.**

It is the sense of Congress that—

(1) the United States believes that the independent nuclear deterrent and decision-making of the United Kingdom provides a crucial contribution to international stability, the North Atlantic Treaty Organization alliance, and the national security of the United States;

(2) nuclear deterrence is and will continue to be the highest priority mission of the Department of Defense and the United States benefits when the closest ally of the United States clearly and unequivocally sets similar priorities;

(3) the United States sees the nuclear deterrent of the United Kingdom as central to trans-Atlantic security and to the commitment of the United Kingdom to NATO to spend two percent of gross domestic product on defense;

(4) the commitment of the United Kingdom to maintain a continuous at-sea deterrence posture today and in the future complements the deterrent capabilities of the United States and provides a credible “second center of decision making” which ensures potential attackers cannot discount the solidarity of the mutual relationship of the United States and the United Kingdom;

(5) the United States Navy must execute the Ohio-class replacement submarine program on time and within budget, seeking efficiencies and cost savings wherever possible, to ensure that the program delivers a Common Missile Compartment, the Trident II (D5) Strategic Weapon System, and associated equipment and production capabilities, that support the successful development and deployment of the Dreadnought submarines of the United Kingdom; and

(6) the close technical collaboration, especially expert mutual scientific peer review, provides valuable resilience and cost effectiveness to the respective deterrence programs of the United States and the United Kingdom.

“(ii) due to special labor requirements;

“(iii) due to special geographic requirements, except as provided in subparagraph (B);

“(iv) due to unique Federal buying patterns or requirements; or

“(v) to recognize a new industry.

“(B) **EXCEPTION FOR GEOGRAPHIC REQUIREMENTS.**—The Administrator may not further segment an industry category based on geographic requirements unless—

“(i) the Government typically designates the geographic area where work for contracts for goods or services is to be performed;

“(ii) Government purchases comprise the major portion of the entire domestic market for such goods or services; and

“(iii) it is unreasonable to expect competition from business concerns located outside of the general geographic area due to the fixed location of facilities, high mobilization costs, or similar economic factors.

“(3) **DETERMINATIONS WITH RESPECT TO AWARDS OR CONTRACTS.**—Determinations made pursuant to paragraph (1) may be made for individual awards or contracts, any part of an award or contract or task order, or for classes of awards or contracts or task orders.

“(iii) why the proposed procurement cannot be offered to increase the likelihood of the participation of small business concerns;

“(iv) in the case of a proposed procurement for construction, why the proposed procurement cannot be offered as separate discrete projects; or

“(v) why the contracting agency has determined that the bundling of contract requirements is necessary and justified.

“(D) FAILURE TO AGREE ON AN ALTERNATIVE PROCUREMENT METHOD.—If the procurement center representative and the contracting agency fail to agree on an alternative procurement method, the Administrator shall submit the matter to the head of the appropriate department or agency for a determination.

“(5) CONTRACTS FOR SALE OF GOVERNMENT PROPERTY.—With respect to a contract for the sale of Government property, small business concerns shall receive any such contract if, in the determination of the Administrator and the disposal agency, the award of such contract is in the interest of assuring that a fair proportion of the total sales of Government property be made to small business concerns.
